External Affairs and  
International Trade Canada

Affaires extérieures et  
Commerce extérieur Canada

**UNITED STATES**  
**BUYERS OF**  
**SPECIAL CROPS AND PULSES**

This 1991 directory, of Special Crops and Pulse buyers was produced by the Agri-Food Division, of External Affairs and International Trade Canada, with the assistance of our Canadian Consulates. A separate International version is also available.

There are some States missing from this issue as it goes to press. However, the intention is to up-date the directory annually if possible, and the next issue will include more States and detailed information on products of interest to the buyers. Trade Associations and Councils have been included where the information was available.

The Buyers listed in this directory are generally known to our Trade Offices in the United States. However, it is the responsibility of the individual Canadian exporter to check the commercial standing of any firms with which commercial arrangements are being contemplated or entered in to.

Any comments or suggestions, particularly from Canadian exporters, on the form or content of this publication in time for the next up-date would be welcome.

President - Jeff Berkow

Plant handles soybeans too. National Sun wants to get involved with crambe, another oilseed. Sunflowers are shipped from as far away as Kansas and Canada, although most are from a 120 - mile radius. Most of the sunoil and soyoil goes to ports on the Gulf of Mexico for export; most of the meal is used domestically. National Sun prefers to buy sunflowers from elevators.
