ANALYSIS OF TRADE AND INVESTMENT QUESTIONS

National Angus Reid Poll

Department Of Foreign Affairs And International Trade

December, 1997

Methodology

A total of 1,516 adults were surveyed. The findings are representative of Canada's regional, age, and gender composition in accordance with the 1996 Census. The overall margin of error is $\pm 2.5\%$. Sub-sample analysis will carry with it a larger margin of error.

Strategic Considerations

A majority of Canadians believe that increased trade is a good thing that will result in more jobs for Canadians. Those most likely to see a link between trade and jobs are men and Canadians with higher levels of education and income. There is a 20% difference between those with a university degree and those who have a high school education or lower and a 10% difference between men and women on this question. These findings suggest that there is an opportunity to communicate with women and Canadians who have lower levels of education to increase their awareness of Canada's trade status and the links between job creation and international trade and investment.

Detailed Findings

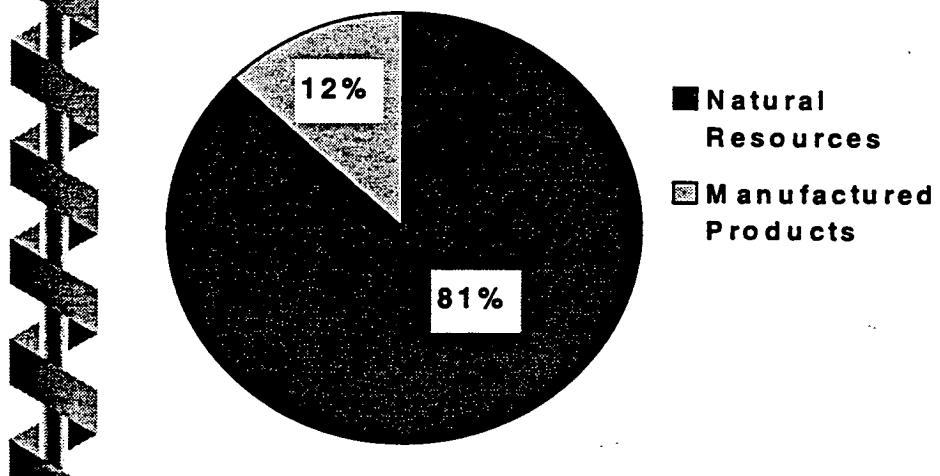

More than two-thirds (68%) believe that in the future, increased trade with other countries will result in more jobs for Canadians. Only one-quarter (24%) feel that increased trade will result in fewer jobs. Men and Canadians with higher levels of education and income are most likely to see a link between job creation and trade.

As far as Canada's current import/export status is concerned opinion is evenly split with a third of Canadians (34%) believing that Canada exports more goods than it imports and slightly more (36%) saying that Canada imports more goods than we export. Two in ten (21%) say that Canada's imports and exports are about equal. Those most likely to see Canada as a net exporter include residents of British Columbia and Ontario, men and Canadians with a university degree. Those most likely to see Canada as net importers include residents of Quebec, Alberta and Atlantic Canada and women.

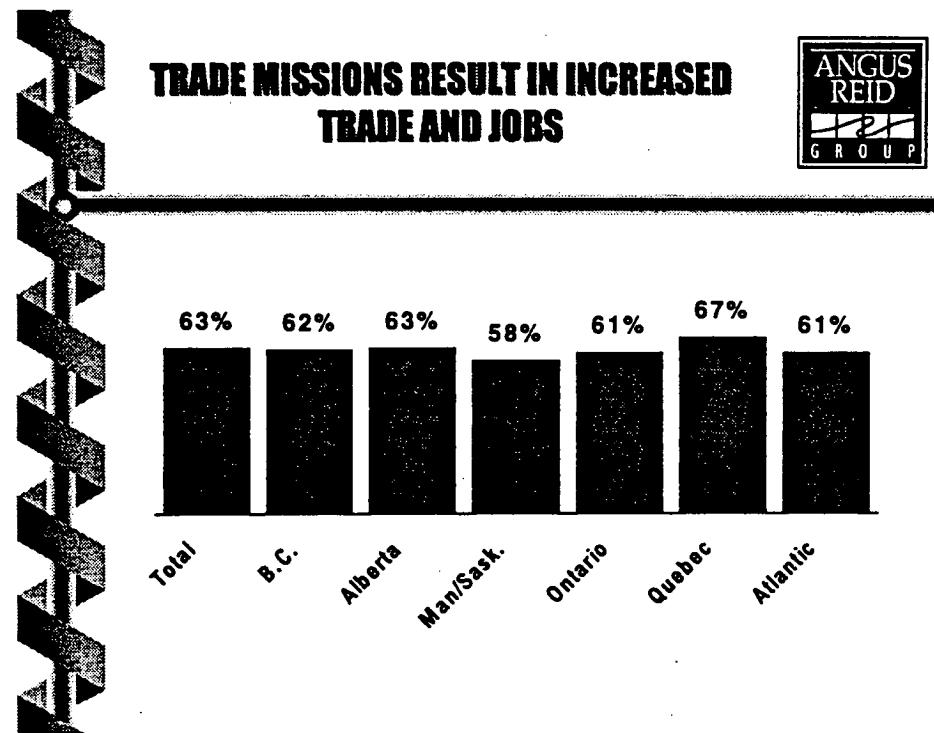

CANADA IS AN EXPORTER OF?

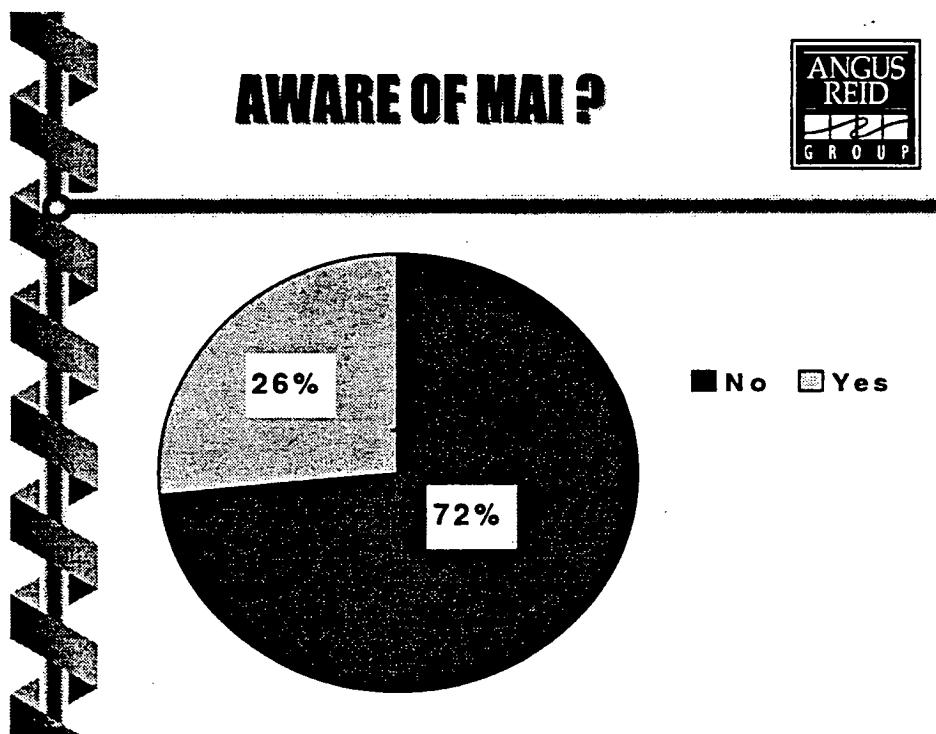

The vast majority of Canadians (81%) primarily see Canada as an exporter of natural resources, such as forest products and minerals. Only one in ten (12%) think of Canada as an exporter of manufactured products, such as automobiles and machines. Those most likely to say that Canada is an exporter of natural resources include residents of British Columbia, Alberta, Saskatchewan, Manitoba and the Atlantic Provinces. As well, those Canadians with more than a high school degree and those with household incomes of more than \$30 thousand believe that Canada is an exporter of natural resources.

When asked specifically about trade missions and told that federal, provincial and business leaders are going to several countries in Latin America to promote Canadian trade, close to two-thirds (63%) agreed that these trade missions will result in increased trade and jobs for Canadians. One-third of Canadians (32%) say that these trade missions will do nothing to create new jobs. Those most likely to say that these trade missions will result in increased trade and jobs for Canadians are men, residents of Quebec and those Canadians with higher levels of education and income.

Despite recent media coverage, only one-quarter of Canadians (26%) had heard or read anything about "a proposed international agreement on investment called the Multilateral Agreement on Investment, or MAI". More than seven in ten (72%) were not aware of the agreement. Residents of Quebec, women, Canadians aged 18 to 34 and those people with lower levels of education and income are less likely to be aware of the MAI. When asked what they had heard of the Multilateral Agreement on Investment, 30% had heard positive things like: it is good for Canada; will attract investment; encourage trade; and create jobs. Twenty-one percent had a negative response, such as: it is bad for Canada; loss of sovereignty; bad for the environment; and won't be able to protect culture. Nine percent responded that what they had heard was neutral and 38% didn't know or couldn't remember what they had heard about the MAI.

APPENDIX I - QUESTIONNAIRE

Trade and Investment Questions

1. As a trading nation, Canada both exports products and services to other countries and imports products and services from other countries. Would you say that in the future, increased trade with other countries will result in more jobs for Canadians overall or fewer jobs overall?
More jobs – 68%
Fewer jobs – 24%
(The same) – 3%
- 2.a) And why do you say more jobs?
Exports create jobs – 49%
Canada has good products/technology – 10%
Trade creates higher employment – 7%
Good for Economy – 5%
Free trade/NAFTA – 5%
- 2.b) And why do you say fewer jobs?
Other countries cheaper – 35%
Imports bad for jobs – 22%
Free trade/NAFTA – 10%
Jobs/Businesses will move elsewhere – 8%
Lower costs elsewhere – 7%
3. From what you know, which of the following best describes the current situation for Canadian trade?
We export more goods than we import – 34%
We import more goods than we export – 36%
Imports and exports are about equal – 21%
4. Would you say Canada is?
More an exporter of manufactured products, such as automobiles and machines – 12%
More an exporter of natural resources, such as forest products and Minerals – 81%
About the same – 3% (Volunteered)

5. In January, federal, provincial and business leaders are going to several countries in Latin America to promote Canadian trade there. Some people say these trade missions will result in increased trade and jobs for Canadians. Some people say these trade missions will do nothing to create new jobs for Canadians.

Which view is closer to your own?

Increased trade and jobs for Canadians – 63%

Do nothing to create new jobs for Canadians – 32%

6. Have you heard, seen or read anything about the talks between Canada and other countries for a proposed international agreement on investment called the "Multilateral Agreement on Investment", or MAI?

Yes – 26%

No – 72%

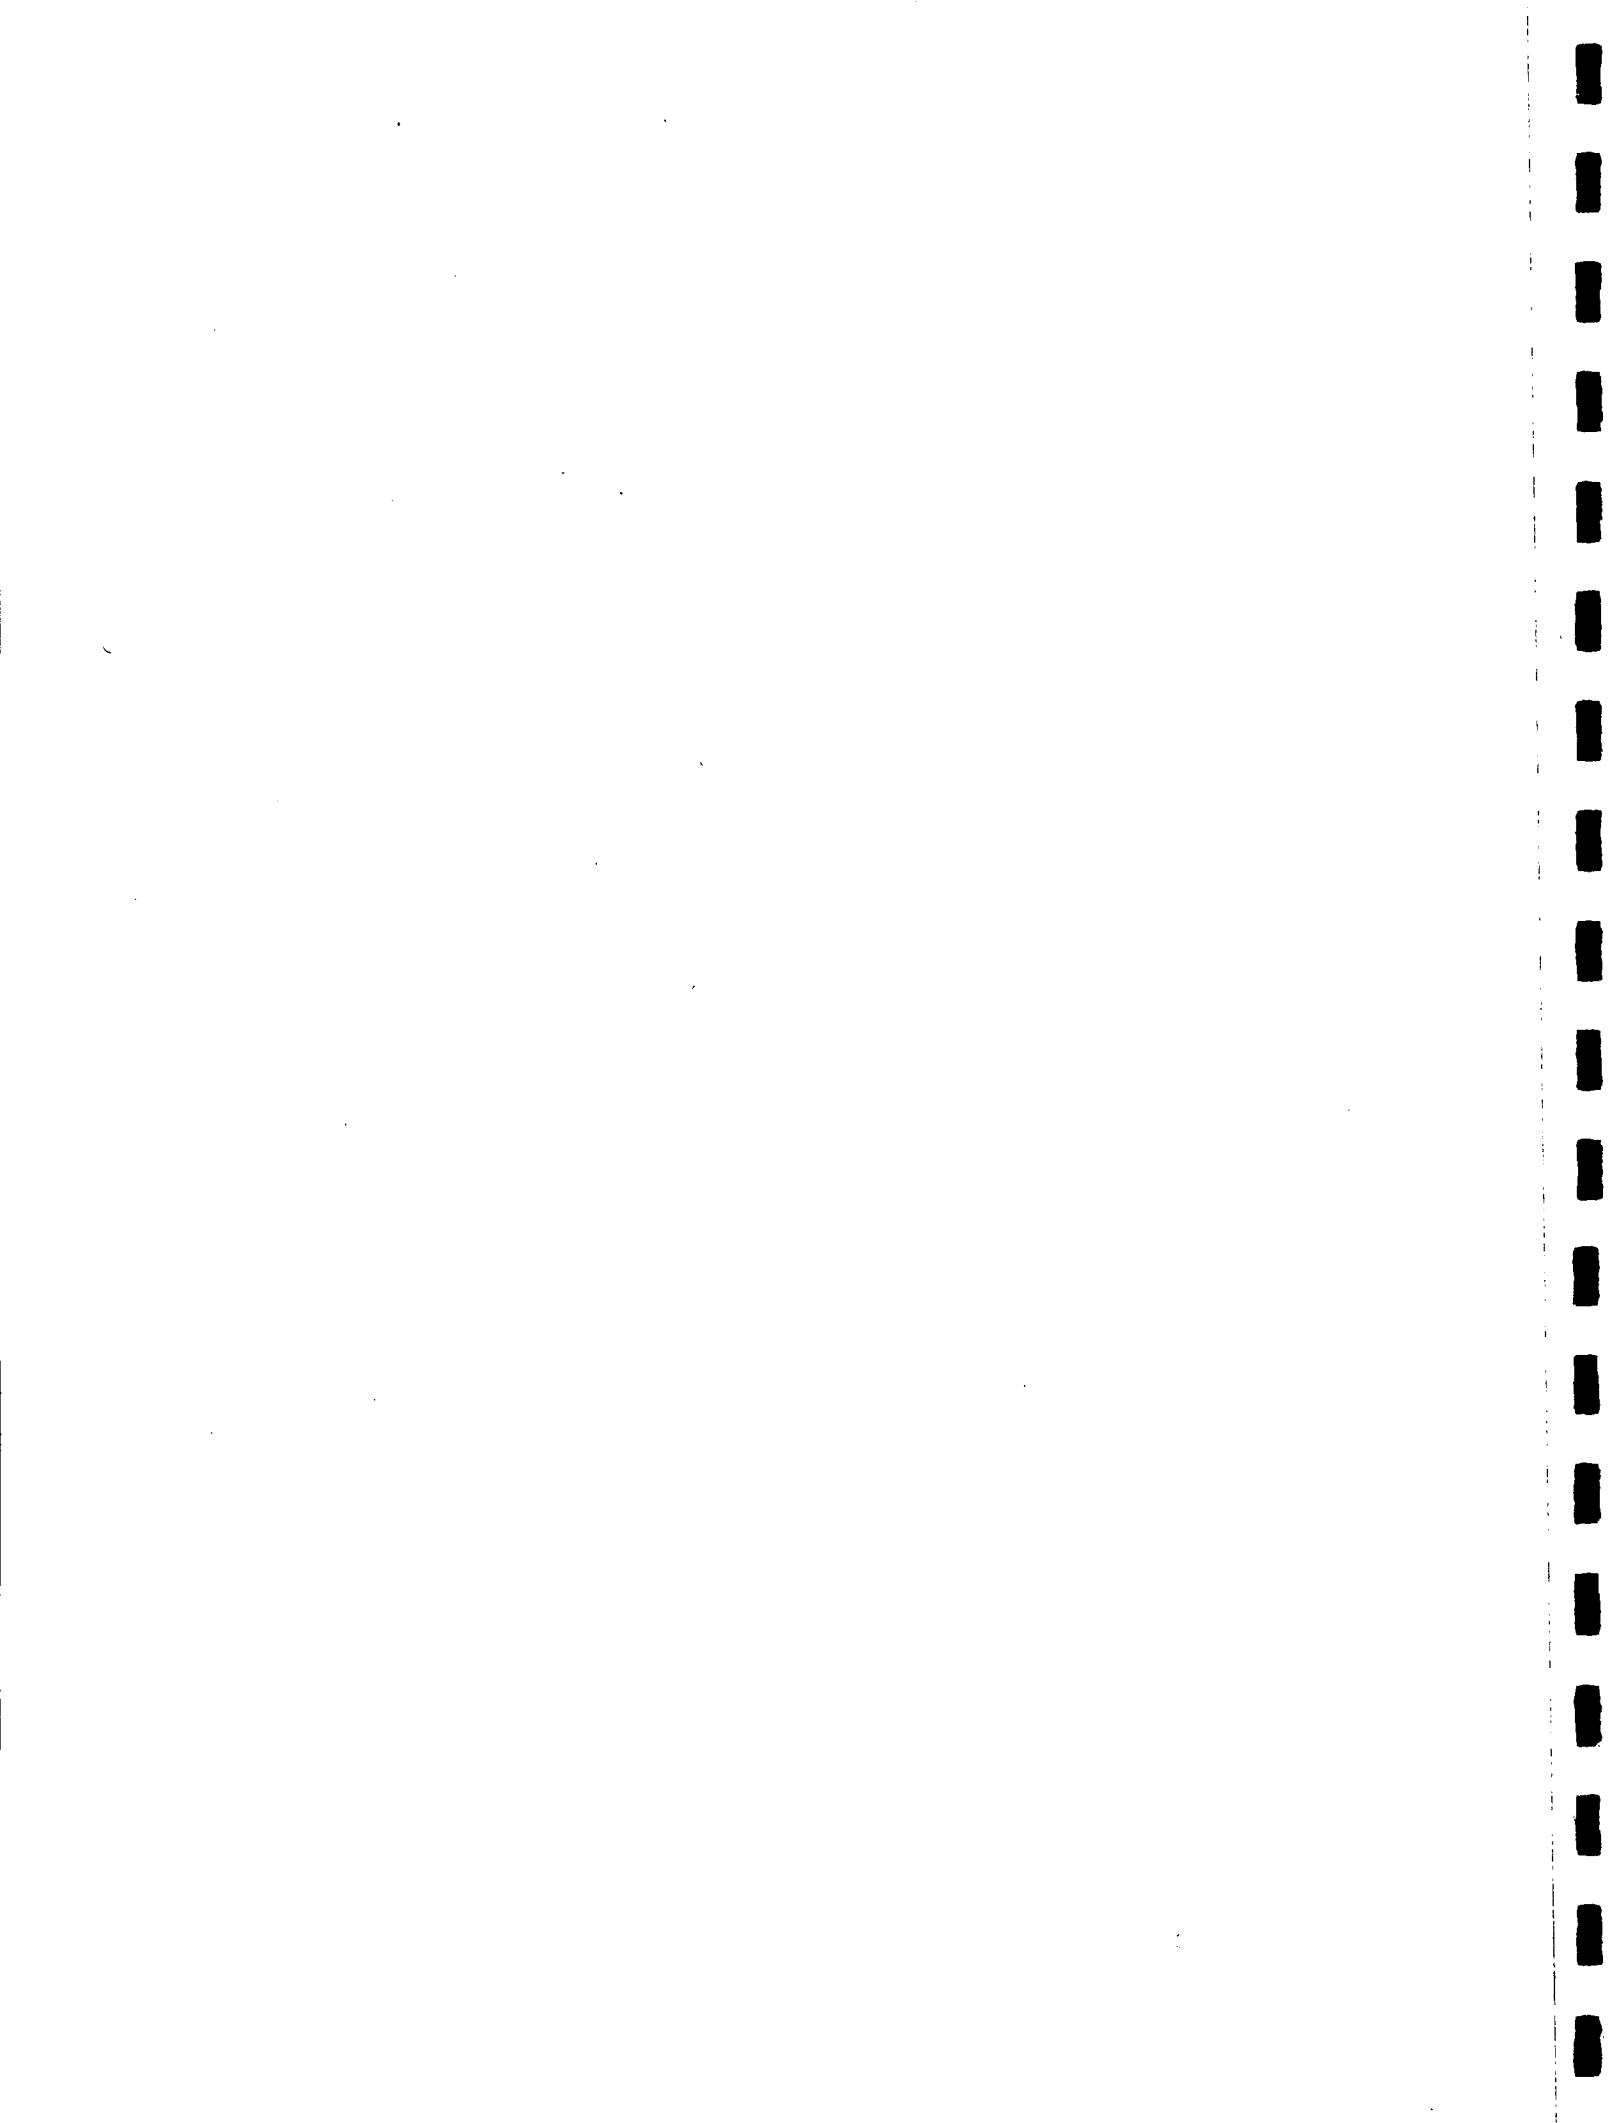

7. And what have you heard, seen or read about the Multilateral Agreement on Investment, or MAI

Bad for Canada – 11%

Good for Canada – 8%

Attract investment – 7%

APPENDIX II - DETAILED TABLES

Region:

| | Total | TRADE INCREASE WILL CREATE | | |

1. As a trading nation, Canada both exports products and services to other countries and imports products and services from other countries.

Would you say that in the future, increased trade with other countries will result in more jobs for Canadians overall or fewer jobs overall?
