

STATEMENT DISCOURS

SECRETARY
OF STATE
FOR EXTERNAL
AFFAIRS.

SECRÉTAIRE
D'ÉTAT AUX
AFFAIRES
EXTÉRIEURES.

86/05

Remarks by the Secretary of
State for External Affairs,
the Right Honourable Joe Clark,
on the occasion of the ceremony
to mark the successful
completion of the second 500 KV
Transmission Line and
Units 9 and 10
in Tarbela, Pakistan
on December 20, 1985

January 20, 1986.

I am truly pleased and honoured to be here at Tarbela, to take part in this ceremony to mark the successful completion of your second 500 KV Transmission Line, and Units 9 and 10 of this giant power source. Tarbela is, as you know, the world's largest earth-filled dam, and currently generates about half of Pakistan's electric power output. This prompts two reflections on my part.

First, I feel as if we are at the very heart of your country. It is highly appropriate that this immense dam is built of the precious earth of Pakistan itself and I am proud that the skills and expertise of Canadians are present here as well, and that we have been allowed to help you create all this.

Second, Tarbela is indeed a huge achievement. You have built here a benign giant of development and progress -- a triumph of technology, immense in power and scale. Tarbela, and the lines transmitting its power to the rest of the country, owe their existence to the ingenuity and effort of individuals, Pakistani and Canadian, working together in close cooperation and true partnership. The real glory of Tarbela lies not in its gigantic dimensions, but in the vast number of lives it can improve, as it powers industries, and brings light to classrooms and clinics.

Tarbela is special -- not only by virtue of its size, but because it is an outstanding example of the continuity in Canada's development partnership with you.

Soon it will be forty years since our two countries began an excellent and increasingly friendly, relationship. Over that period, there has been a continuing tradition of Canadian involvement in Pakistan's development, particularly in the energy sector.

There are a number of "firsts" to our credit-starting with Warsak, your first major hydro development after independence, extending right up to your initial 500 KV Transmission Line, a first for Asia.

Since our initial involvement in the construction of the Tarbela dam, we have maintained our support for the expansion of Tarbela's generation capacity. Canada has supplied the turbines for Units 5 to 10 inclusive, the generators for Units 5 to 8, as well as the first 500 KV Transmission Line. I am especially pleased that tomorrow I will have the opportunity of signing the CIDA Loan Agreement on Units 11 and 12, and witnessing the signature of the EDC Loan Agreements for Units 11 and 12 and 13 and 14.

These two completed projects, Units 9 and 10, and the second 500 KV Transmission Line, demonstrate how much can be achieved through developmental cooperation between our countries. These are complex projects and their successful completion shows clearly that cooperation and coordination can achieve remarkable results in bilateral development efforts.

Not only have these two projects been successfully completed, they were finished on or ahead of schedule -- with the second line completed below budget. These results indeed reflect extraordinary efforts on the part of the Water and Power Development Authority, CIDA, Canadian manufacturers and consultants, and every last worker who made this possible.

We recognize the top priority given energy development in Pakistan and we appreciate the enormity of this task. We are most pleased that we could be of help to you in meeting the challenge. Our continuing support to the expansion of Tarbela's capacity, along with the very important maintenance training program carried out by Wapda in collaboration with Ontario Hydro, symbolize Canada's desire that our two countries should remain, for the long haul, partners in development.

Finally, I would like to say a simple "thank you" on behalf of Canada. Thank you for the contribution that the people of this land have made over the centuries to the global patrimony of culture and art and knowledge that enriches every human. Thank you for the 50,000 Canadians of Pakistani origin who are contributing so splendidly to every aspect of life in Canada and--since your future is also part of our future--thank you for welcoming Canadians into your country and your life so that we can work together in the cause of world development.
